

COMPANY PROFILE

TOTAL MARINE SOLUTION

Marine Engineering • Ship Repair & Maintenance • Material Supply

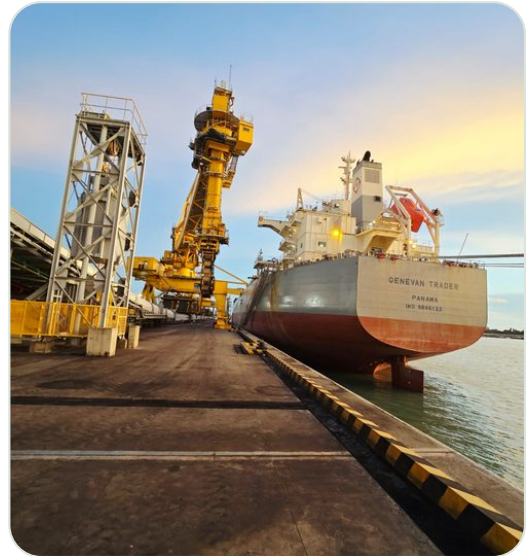

Sadarghat, Chittagong, Bangladesh | info@bd-tmt.com | +88 01715 820 300

About Us

Total Marine Solution is a trusted provider of comprehensive marine engineering, ship maintenance and maritime support services, based in Chittagong, Bangladesh. We deliver reliable, cost-effective and high-quality solutions to ship owners and operators, ports, shipyards, offshore industries and government organizations.

With a firm commitment to safety, quality and operational excellence, we provide a complete range of technical services, equipment maintenance, material supply and engineering support to keep marine assets operating safely and efficiently. Our experienced team of marine engineers, technicians and procurement professionals delivers timely, dependable and customized solutions that meet international maritime standards.

From engineering design through to project completion, we stand beside our clients at every stage — with OEM or custom-made solutions, strict compliance and round-the-clock technical support.

OUR MISSION

To provide safe, reliable and innovative marine engineering services and supply solutions that maximize vessel performance while ensuring complete customer satisfaction.

OUR VISION

To become a leading and trusted marine engineering and supply company, recognized for quality, integrity, innovation and technical excellence throughout the maritime industry.

Our Services

SERVICE 04

Marine Material Supply

Your trusted supplier of scrap ship spares and imported valves, pipes and fittings. We supply a wide range of genuine, high-quality marine and industrial products, sourced globally and delivered on time.

VALVES

Gate, ball, butterfly, check and globe valves — marine and industrial grade.

PIPES

Carbon steel, stainless steel, PVC and other industrial-grade piping.

FITTINGS

Elbows, tees, reducers, couplings, flanges and essential pipe fittings.

GASKETS & MORE

Spiral wound, metal and rubber gaskets, NRVs and miscellaneous items.

Also in our range: machinery spare parts, electrical components, navigation and safety equipment, engine consumables, marine paints and chemicals, bearings, fasteners, marine tools, PPE, deck and engine stores.

SERVICE 05

Precision Fabrication

High-quality metal fabrication tailored to marine, construction and industrial needs — from precision-engineered components to on-board modification at client premises.

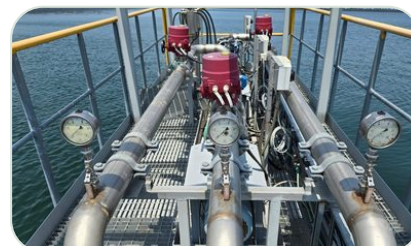

- Custom metal fabrication — cutting, bending, welding
- Structural fabrication for industrial projects
- Sheet metal cutting, punching & forming
- CNC cutting & machining
- Welding & assembly
- Scrap ship plate priming & sizing
- Powder coating & finishing
- Offshore / on-board modification & servicing

SERVICE 06

Procurement & Logistics

- Global sourcing & vendor management
- Inventory support
- Import & export coordination
- Door-to-port delivery
- Inspection & expediting
- On-time material supply
